

Greg's Cookbook V3

Overview

Greg's Cookbook Version 3 is a database driven cookbook management system.

It's features are:

- Graphical User Interface
- Recipe website scraper
- New recipe entry
- Edit screen
- Print a recipe
- Images for the recipes
- Over 60 preset categories
- Selectable themes for the screens (coming soon)

This document is currently under construction, so there might be some or many parts missing. Please be patient.

Requirements

- Python 3.7 or greater
- The following libraries must be installed:
 - requests
 - recipe_scrapers
 - Pillow
 - tkcolorpicker

All of the required libraries can be installed via Pip

Screens

The screen shots are not yet complete...

Main Screen

New Recipe Screen

Edit Recipe Screen

Web Scraper Screen

Database Utilities Screen

Configuration Screen

The Configuration module is currently not implemented. It is assumed that it will be available sometime before February 29, 2020.

Using Greg's Cookbook

Within the distribution folder, you can start the program by typing:

```
bash $ ./cookbook3.py
```

From there, you will be presented with the main screen.

Yet to be completed

For curious programmers...

To be compleated soon...
